Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

With respect to claims 2-4, there is no cited art that discloses a control circuit to operate the first MOS to become conductive by supplying a voltage opposite the polarity of the supply voltage supplied by a pump circuit in further combination with a switch circuit having a first and second MOS transistor, wherein the source and gate of the second MOS transistor is coupled to the control circuit and the first and second MOS transistors have antiparallel source-drain diodes to control the MOS transistors to have maximum breakdown voltages in mutually opposite directions as recited.

With respect to claim 5, there is no cited art that discloses a control circuit to operate the first MOS to become conductive by supplying a voltage opposite the polarity of the supply voltage including a resistor and current source connected to the second MOS transistor as recited in further combination with a switch circuit having a first and second MOS transistor, wherein the source and gate of the second MOS transistor is coupled to the control circuit and the first and second MOS transistors have antiparallel source-drain diodes to control the MOS transistors to have maximum breakdown voltages in mutually opposite directions as recited.

With respect to claim 6, there is no cited art that discloses a second resistor element and a current mirror connected as recited and being connected to the resistive element, the power supply reference conductor, the further power supply reference conductor and second MOS transistor of the circuit as recited in 6. Claim 7 is allowable for at least the same reasons as claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
